I was talking to some fare inspectors on Muni who were busting some fare-evading bums and told them to keep up the good work. They said there's only 45 of them for the whole city - but they're hiring. So if you're looking for a job that pays well with all those government job benefits, go on down to Muni and apply. These drug addicts and shoplifters are using Muni as a free shuttle to get around town and ruin it. Making riders pay will do a lot to improve the quality of life here.

On a similar note, I heard some of an interview with an author on the Fix California radio show/podcast. The author was named Christopher Moritz and he has a book out titled *Failed State: A Portrait of California in the Twilight of Empire*.

Moritz is a California native who grew up in Santa Monica, and has witnessed its decline. Who does he blame? Anarchist billionaires (like George Soros) who bankroll open border politicians who have transformed the Golden State into a haven for drug cartels. As well as policymakers more concerned with rattling off "woke" buzzwords like "diversity, equity, and inclusion" than public safety.

Symbolic of the state's decline are two people Moritz says have failed upward. He considers them successes as politicians but failures as human beings: Gavin Newsom and Kamala Harris.

Newsom is governor but is so focused on national issues you would never know it. Despite his reign of error - from ordering the longest insane Covid lockdown of any state, to blaming global warming for the recent Los Angeles fires instead of government mismanagement - no major candidate for governor criticizes his record.

Kamala Harris is the odds on favorite to be our next governor. Moritz cites her dating Willie Brown, the then most powerful man in California, for her rise. Despite her being a District Attorney, an Attorney General, a Senator, and a Vice-president, she has accomplished nothing. Unless you consider that as California A.G. in 2014, she sold Proposition 47, which drastically lowered penalties for crimes, to California voters as the "Safe Neighborhoods and Schools Act." Since then crime has skyrocketed here.

Actually, she had another "accomplishment" when she was Vice-president. Joe Biden

named her "border czar" and she proceeded to open the southern border, resulting in over seven million people entering, the vast majority of them unvetted and here illegally.

What finally made Christopher Moritz write his book? His house got burglarized while he was in it by an illegal alien, who happened to be a member of the murderous MS-13 gang. The intruder was in the country illegally and was deported during Donald Trump's first term as president. He crossed the border illegally back into the U.S. during Joe Biden's presidency.

The burglar was caught by the police after leaving Moritz's home. The arresting officer thanked the burglar for not shooting him.

The burglar replied that if he didn't have his wife and anchor baby in the car, he would have shot the cop.

Life is But a Dream...

By Ace Backwards

I remember this one night, I was sleeping at my campsite. And I woke up in the morning from this really strange dream. So I got up out of my sleeping bag, packed up my stuff, and headed on down the trail.

But then I woke up again. And I was still lying there in my sleeping bag. I realized I hadn't really woken up the first time. I had

still been dreaming. I just dreamed that I woke up.

So I got up out of sleeping bag, packed up my stuff, and headed on down the trail.

But then, I woke up AGAIN. And I was still lying there in my sleeping bag. I had dreamed that I had woken up a second time.

So now I'm lying there in my sleeping bag. And I'm looking all around. And I'm thinking: Did I really wake up this time for real? Or am I still dreaming. Everything looked really real. But then, everything had looked really real the other times, too, when I had been dreaming.

So I got up out of my sleeping bag, packed up my stuff, and headed on down the trail.

And got on with my life. So I guess I had really woken up for real that time.

But who knows for sure. Maybe all the stuff that happened to me over the last couple of years has all been part of a long and elaborate dream. And maybe at some point I'll finally wake up from this dream.
